Fabience

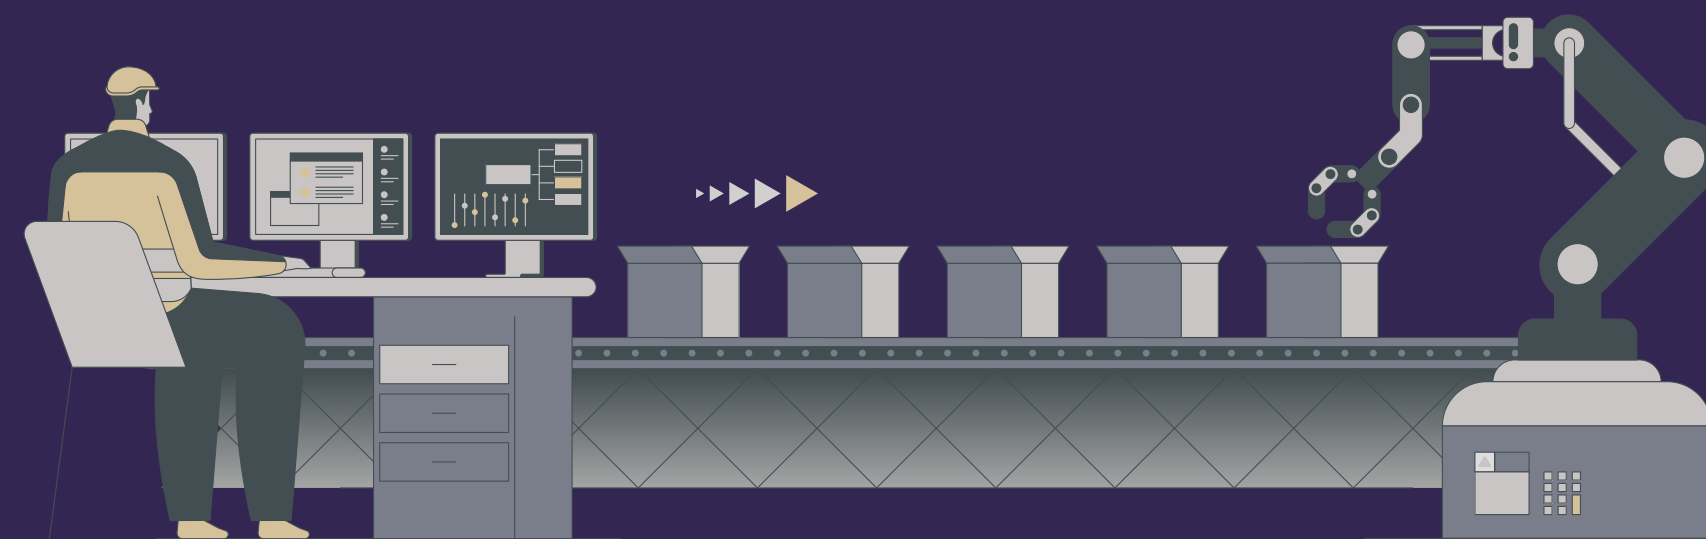

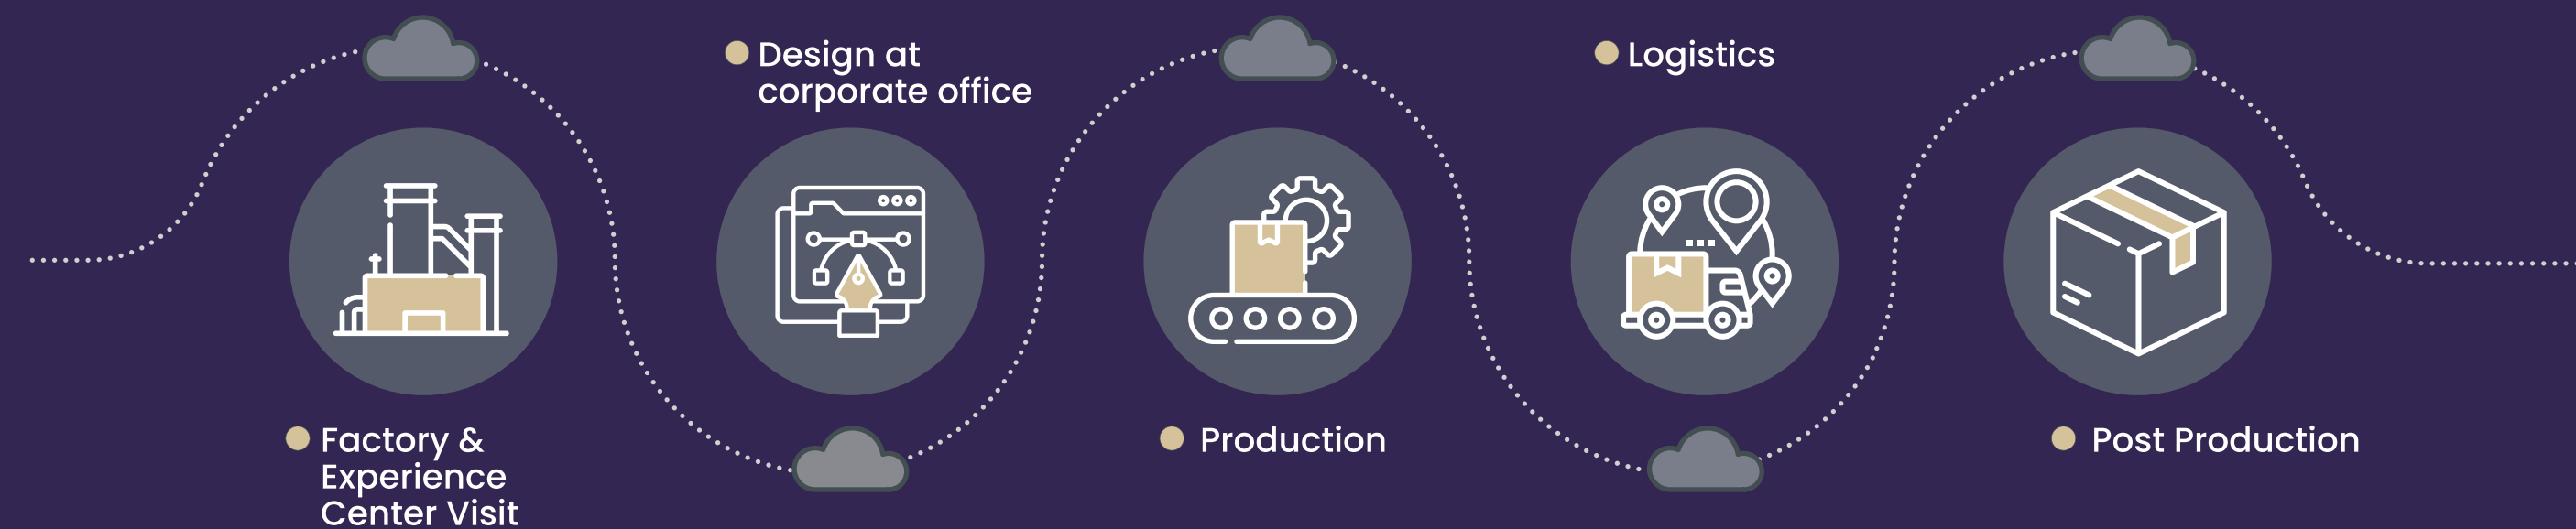

Fabience began with a simple idea: to bridge the gap in the luxury furniture market. This vision led to our incorporation in 2019. In just four years, we have successfully executed nearly 1,500 projects, establishing ourselves as a niche leader in the luxury furniture industry.

Live your Ambience

Our Process

At Fabience, we offer more than just products; we deliver an unforgettable experience that our clients will cherish. The journey begins with a visit to our world-class Experience Center and Factory, where clients gain insights into our product offerings. Next, clients visit our Corporate Office in Jubilee Hills to finalize the design and approve the drawings. These drawings are then reviewed and sent to the factory for production and dispatch. The final stage is the installation process at the client's site.

Various Products

Areas of application

At Fabience, we manufacture a plethora of products with the utmost attention to every minute detail. Our offerings, including Kitchens, Wardrobes, TV units, Crockery Units, Vanities, and more, are unparalleled in quality, reliability, finish, and design.

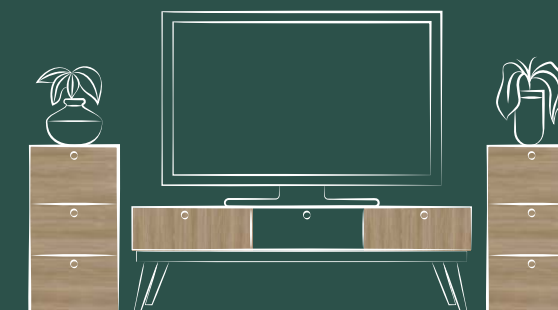

Kitchens

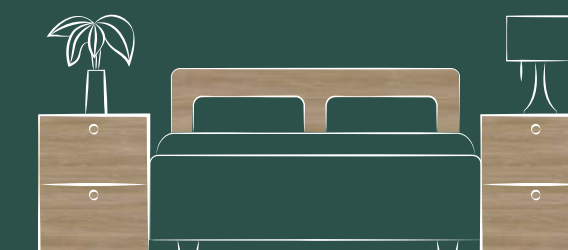

Crockery Units

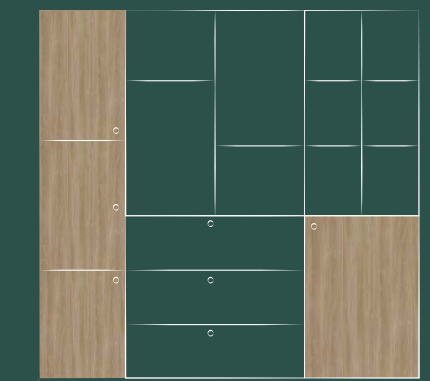

Vanities

TV Units

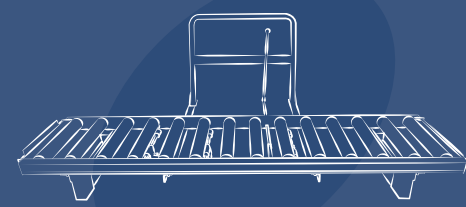

Beds & Side Tables

Wardrobes

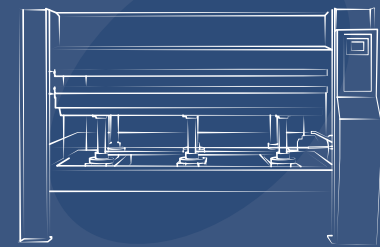

Our Machinery

This is the order of the processes we adopt to convert raw materials into finished goods.

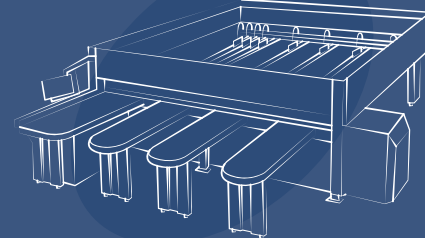

1 Horizontal Conveyor

Used to move materials from station to station

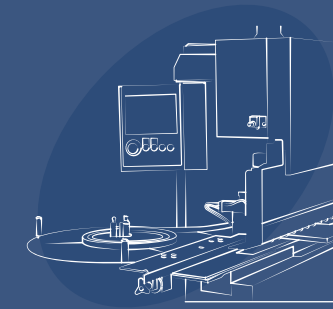

2 Hot press

Used to press Laminates, Acrylics, Veneer on plywood and HDHMR

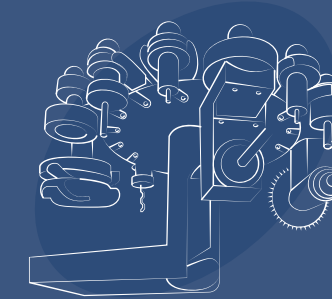

3 Beam Saw

Used for cutting the pressed boards

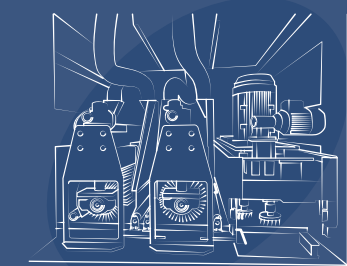

4 Edge banding

Used to edge band the cut panels.

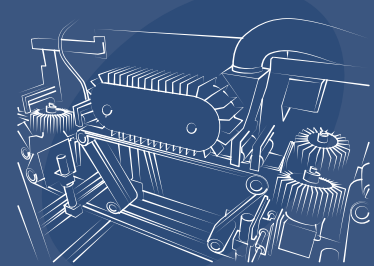

5 CNC

Used in routing, grooving and boring

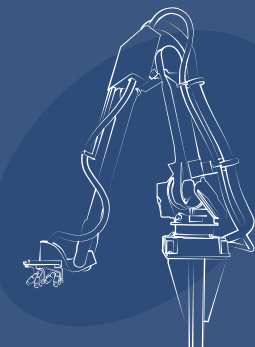

6 Surface Sanding

Used for surface sanding for painted panels

7 Edge sanding

Used in sanding the panel edges for a smooth finish

8 Robotic Spray

Used to spray paint panels

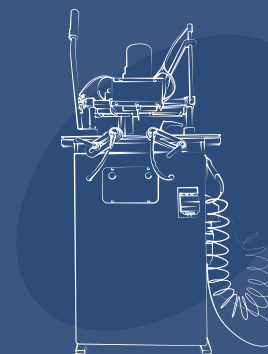

9 Buffing

Used for production of PU High gloss panels

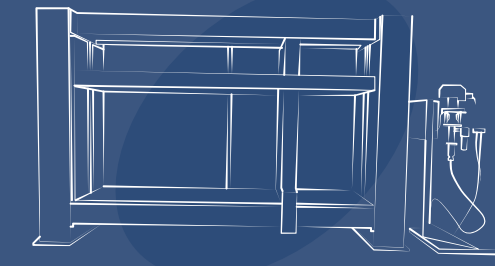

10 Aluminium Cutting

Used in cutting the Aluminium profiles

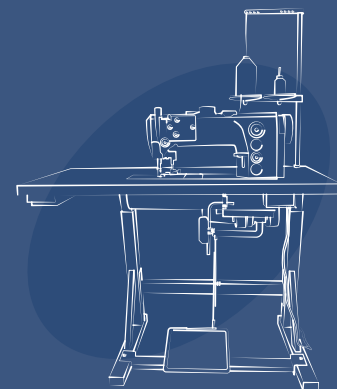

11 Aluminium CNC

Used in boring process for Aluminium profiles

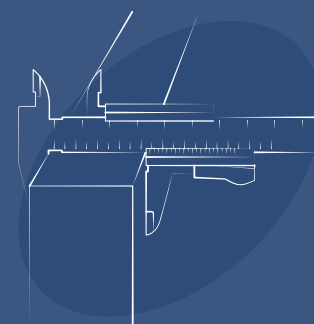

12 Box Assembly

Used in assembling of the base and wall units

13 Leather Sewing

used to stitch patterns on leather

14 Quality Check

Thoroughly check the final quality of the product

15 Packing

Meticulously pack the final product

Array of Finishes

All our finishes are crafted using world-class Italian machinery and offer a brilliant sense of touch. Below is a list of all the finishes available at Fabience.

Laminate

Acrylic

PU Matte

PU High Gloss

Leather

Veneer Matte

Lacquer Glass

Lacquer Matte Glass

Veneer High gloss

Wicker

Sandwiched glass with mesh

Excimer Dead Matte

Tinted Glass

Sandwiched glass with fabric

Core Materials

Moisture-resistant

Bubble-free finish

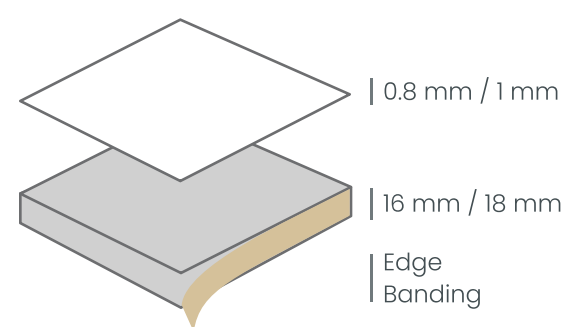

UV-resistant

Super-easy to clean

Scratch & abrasion resistant

Birch Plywood

HDHMR

Aluminium Profile

Carcass

Birch Plywood & Laminate

We solely use imported Russian Birch plywood as the core material for all our products including kitchens and wardrobes.

Shutters

HDHMR

HDHMR (High Density high moisture resistant boards) are used for shutters in kitchens & wardrobes

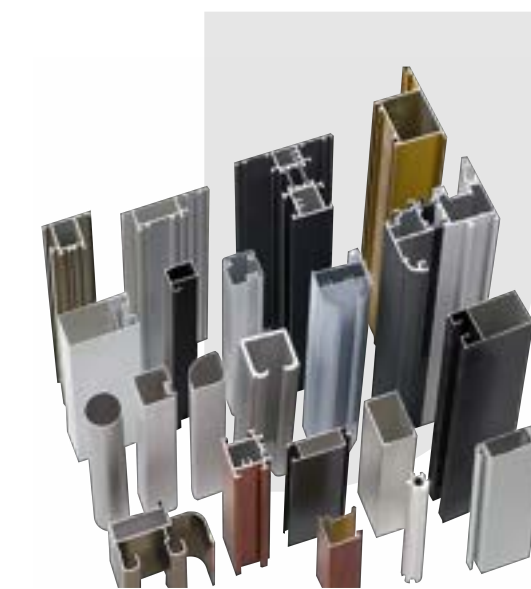

- Laminate Finish
- Acrylic Finish
- PU Finish
- Veneer Finish
- Leather Finish

Aluminium Profile

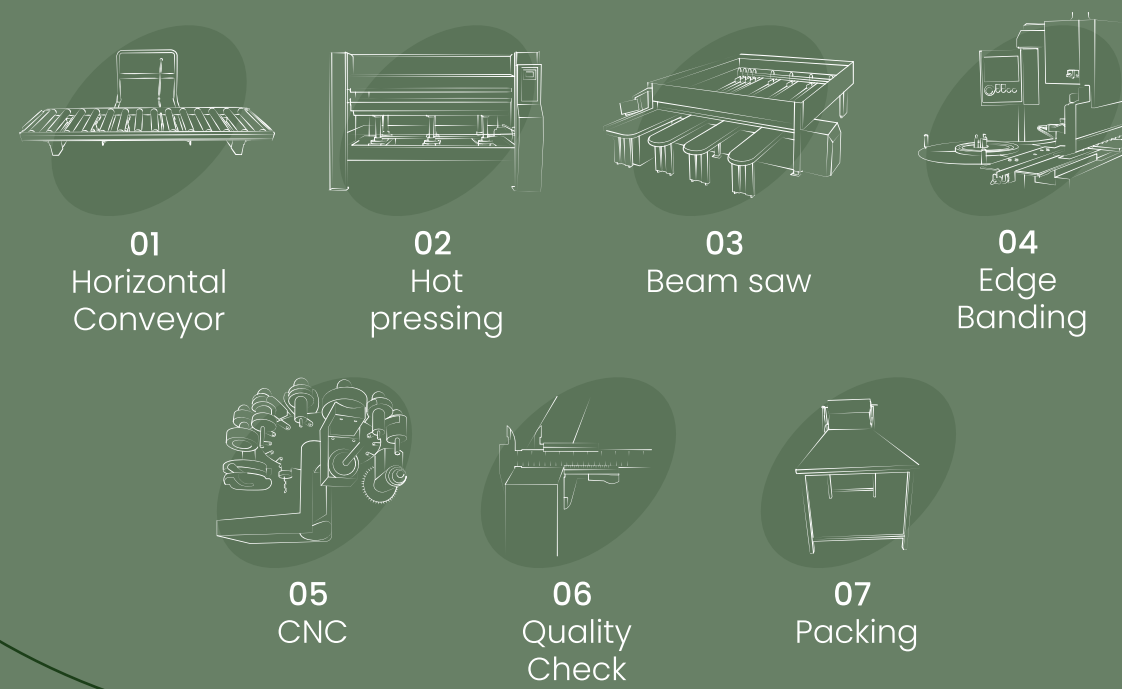

Aluminium frames are typically used as the supporting elements for various glass finishes

- Clear Glass
- Tinted Glass
- Lacquer Glass
- Lacquer Matte Glass

Laminate (Laminieren)

Laminates are decorative sheets made from paper and plastic resins, commonly used for carcasses and shutters in Kitchens and Wardrobes. At Fabience, we use only the finest, top-quality laminates from India and around the world in our manufacturing process.

PU (Malen)

Polyurethane, commonly known as PU, is an advanced, highly scratch resistant, and durable paint product used in wood coating applications. Over the past two years, Fabience has become renowned for its PU finishes. By utilizing a Cefla Robotic Paint Booth and an automatic drying oven with nitrogen gas, we achieve the best results. Today, Fabience proudly supplies PU-coated products not only across India but also to the US market. PU finishes are mainly categorized into three segments.

Additionally, Fabience is one of the few manufacturers in the world producing Excimer Dead Matte finishes. Cured with nitrogen, these paint panels boast a premium silk finish and high scratch resistance properties.

PU coating is not just done on the plane panels but also for panels that are raised such as the neo classic, ombre effect, fluted, Louver panels and other designs according to the clients requirement.

Glass Finish (Silica)

Glass finish is primarily used in wardrobes, bar, crockery and TV units. It adds a stroke of class and luxury to a variety of applications. Glass is usually supported by aluminium frames that are fabricated in house. This comes in a variety of finishes.

Usually, we use different thickness of glasses depending on the application. The aluminium frames are selected accordingly and can be chosen based on their width and the colours.

Leather Finish (Pelle)

Clients often prefer leather finish to add a touch of luxury to their wardrobes or other accessories. At Fabience, we manufacture our leather products in-house, guaranteeing the highest quality and finish. We offer three main types of leather, tailored to our clients' preferences and requirements.

- Bloom
- Floater
- European Soft Nappa

This finish is primarily used in

- Wardrobe shutters
- Jewellery & watch organizers

TV units & Consoles

TV units are indispensable components of home furniture, offering opportunities to showcase various finishes and enhance the aesthetic appeal of the room. A thoughtfully designed TV unit in the living room can incorporate elements such as Natura, Malen, Laminieren, and Silica, leaving a lasting impression of the home's interior design.

This unique tv console unit has hard wood on the edges for creating the perfect rounding design. It is then polished to match the elegance of the perfectly designed wicker shutters.

Vanities

Vanities, coupled with mirrors, serve as focal points in any washroom. At Fabience, we offer customizable mirrors in various shapes to meet our client's specific requirements. Moreover, we can enhance the aesthetic appeal of the bathroom by incorporating LED strips into the mirror design, transforming the ambiance and elevating the overall look.

Crockery Units

Among the huge range of furniture options available at Fabience, Crockery Units stand out for their distinct aesthetic appeal. Like all our products, Crockery Units are available in a variety of finishes, each exemplifying our commitment to exceptional quality.

Finishes for Crockery unit

- Natura
- Laminieren
- Malen
- Silica
- Acrilico

In built Handles

In built handles for shutters and fascias represent the current trend in the interior design world. At Fabience, we offer a myriad of options tailored to our client's specific requirements. Our meticulous process, executed with advanced machinery at our factory, ensures the highest quality standards. Moreover, these handles not only enhance the aesthetic appeal of the shutters but also contribute to ease of maintenance.

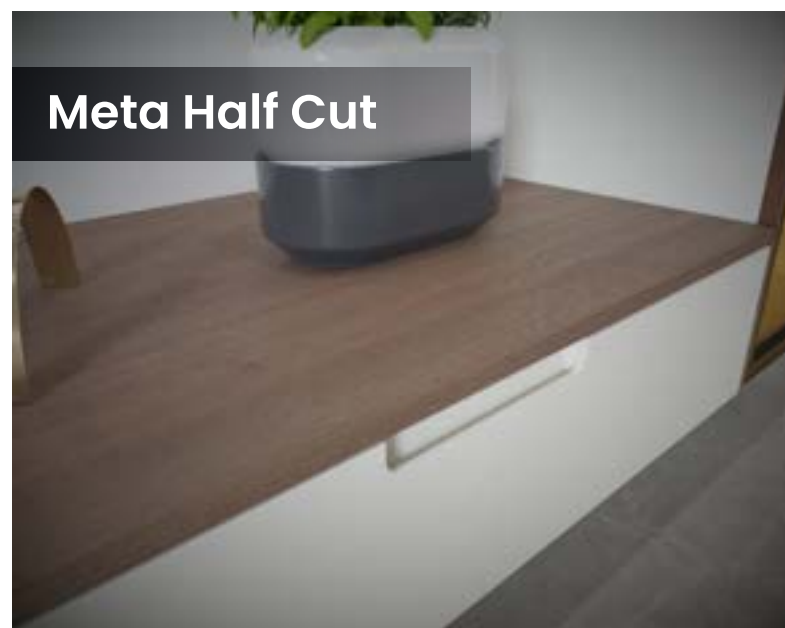

Here are the different in-built handle options available
